This Preliminary Amendment amends the originally-filed Abstract of the above-referenced U.S. application, and provides the amended Abstract on a separate sheet. In addition, originally-filed claims 1-32 of the underlying PCT Application No. PCT/AU2003/001366 have been amended to be an appropriate form for prosecution before the U.S. Patent and Trademark Office, and not due to any reason of patentability. Claims 1-32 are under consideration in the above-identified application. All amendments were implemented pursuant to 37 C.F.R. § 1.121. The amendments to the specification and claims do not add new matter to the application.

The underlying PCT Application No. PCT/AU2003/001366 includes an International Search Report, dated November 7, 2003, a copy of which is included. The Search Report includes a list of document(s) that have been considered by the Examiner in the underlying PCT application. In addition, attached herewith, please find a copy of the Preliminary Examination report for PCT Application No. PCT/AU2003/001366, dated January 27, 2005.

Applicants assert that the present invention is new, non-obvious, and useful. Prompt consideration and allowance of the pending claims are respectfully requested.

Respectfully submitted,

Dated: April 15, 2005
